What Is a Workplace Health Screening Station?

A turnkey and ready to occupy temporary health screening station installed at your workplace, which is staffed by registered healthcare professionals. The station consists of:

- Air-conditioned portable building(s)
- Weather protected queuing area(s)
- Temporary floor with markings to show 1.5m social distance spacing
- Hand washing facility
- Internal and external lighting
- Safety, directional and COVID-19 specific signage
- Transport, installation, commissioning & removal of all infrastructure

To guarantee the ongoing operational readiness, the provisioning of the station can include a full maintenance program, including

- Daily cleaning and sanitisation (on days used)
- Restocking of all non-medical consumables at no additional cost (reasonable use policy applies)
- Daily station and infrastructure checks (on days used)

Employees who are screened and fit to work are identified by a tamper proof wristband which is applied to their wrist by the screening medic. Alternatively, the medic can use your preferred system to release a screened employee as fit to work.

Why Do I Need a Workplace Health Screening Station?

Keeping employees safe and maintaining your business' operational capacity during these times is critical. A valuable tool to assist you in managing this risk is a Workplace Health Screening Station.

As the name suggests, Festival Services is a business seasoned in festivals and events, an industry which in these times has come to a complete halt. As event and logistics experts, it is our daily duty to plan and manage such things as temporary infrastructure and the deployment of onsite medical teams while managing tight deadlines and public safety.

The team at Festival Services has leveraged its existing skill sets and partnered with event industry suppliers to deliver a turnkey solution to ensure the continued operational viability of essential and critical businesses.

How Do You Get a Workplace Health Screening Station?

Call your dedicated account manager at Festival Services now on 07 3810 2500 who will work with you to identify the scale of station which will meet your needs. A site-specific drawing showing the exact layout and configuration of your station is issued along with a proposal and agreement confirming fixed costings for the station. Within the capacity of the installed station, medical staffing levels are adjustable in response to your screening needs.

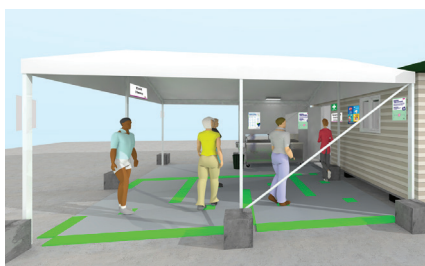

On receipt of your signed agreement, within SE Qld your station can typically be installed and commissioned ready for service in as little as 24-48hrs.

Screening Capacity and Indicative Pricing

Call our team now on 07 3810 2500 to identify the best solution to meet your needs.
